Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. The indicated allowability of claims 1 and 2, is withdrawn in view of the newly discovered reference(s) to Okita et al.. Rejections based on the newly cited reference(s) follow.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claim 1 is rejected under 35 U.S.C. 102(e) as being anticipated by Okita et al. (6,645,067).

Okita et al. disclose a method of instructing a user to read musical notation through interaction with a graphical user interface and an input device coupled to a drumpad, comprising the steps of: generating the graphical user interface (2 via 48), having a first position, including a virtual drum set (figures 7, 8, and 15), having a plurality of pads (58), each pad having a corresponding pad on the input drumpad (7-12); incorporating a music file into the graphical user interface, wherein the music file contains data corresponding to an arrangement of at least a first and a second musical note in sequence, having a rhythmic pattern (abstract and figures 7, 8, and 15);

directing a first game object (54), representing the first musical note in the arrangement, upward, in a first substantially straight trajectory, toward a first pad on the virtual drumpad (figures 7 and 8), corresponding to the first musical note, such that the first game object will experience a first collision with the first pad column 7, line 60 – column 8, line 28); directing a second game object, representing the second musical note in the arrangement, upward, in a second substantially straight trajectory, toward a second pad on the virtual drumpad, corresponding to the second musical note, such that the second game object will experience a second collision with the second bar or pad, according to the rhythmic pattern of the arrangement (figures 7 and 8; column 7, line 60- column 8, line 28); and e) awarding a value to the user based upon the user striking the corresponding key on the input drumpad approximately simultaneously with the first and second collisions (column 8, lines 10-28).

Allowable Subject Matter

4. Claims 2 and 3 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

5. Claims 4 and 5 are allowed.

Conclusion

The examiner regrets to inform the applicant of the withdrawal of indication of allowability of claim 1. However, after further review of Okita et al., it appears that the limitations of claim 1 are met. The claims may be easily amended to overcome this reference. If applicant wishes to have a conference regarding the office action, please feel free to call the examiner at the number below.
